SUMMARY

A multidisciplinary Computer Engineering student specializing in workflow automation, workforce operations, and data-driven process improvement. Experienced in building automated systems for marketing funnels, CRM management, newsletters, and SEO, with additional hands-on work in real-time monitoring, forecasting, and performance reporting. Familiar with AI development and agentic workflows, applying them where they enhance efficiency and support practical business outcomes.

EDUCATION

Carlos Hilado Memorial State University - Alijis Campus | Bacolod City Bachelor of Science in Computer Engineering, 2022 – Present

PROFESSIONAL BACKGROUND

Network Operations & Software Development Intern (OJT) iReply Back Office Services Inc. | Bacolod City | Feb 2026 - Present (Expected Completion: April 2026)

- Executed VoIP and NOC operations, configuring Netsapiens Portals with user queues, auto-attendants, voicemail setups, and integrating softphones (ReachUC, Zoiper).
- Conducted mock call simulations and real-time troubleshooting for Yealink SIP-T46G IP Phones and telecommunications network issues.
- Appointed as Team Leader for the Software Development Mentorship phase, spearheading the adoption of a MERN, AIoT, and Firebase technology stack.
- Leading the development of a **Remote Digital Signage & Public Address (PA) Controller**, functioning as a centralized media orchestrator for event-driven, synchronized content.
- Architecting the system's full-stack infrastructure, integrating a React-based CMS with Drag-and-Drop functionality, a Node.js state-management server, and a Raspberry Pi edge media player.

Digital Marketing & Operations Support Specialist STAR Network Foundation (Outsourced via Doneverse) | Remote | Oct 2025 - Present

- Execute technical builds for marketing funnels using GoHighLevel and Kajabi, configuring order forms, upsell pages, and backend CRM automation workflows.
- Map and draft content to support the four pillars of digital marketing (traffic, conversion, retention, optimization), producing first-pass copy for lead capture pages and email nurture sequences.
- Maintain project compliance and workflow organization utilizing Monday.com as the primary system of record to track progress, ensure task visibility, and flag operational blockers.
- Draft high-fidelity copy and design assets for lead magnets (PDFs), slide decks, and social media, scheduling content via automation tools.
- Build and update internal Standard Operating Procedures (SOPs), surveys, and intake forms to streamline administrative systems and scale team capacity.

Workforce Management - Real-Time Analyst Ubiquity (Client: OURO - formerly Netspend) | Bacolod City, Negros Occidental | April 2024 - April 2025

- Managed real-time adherence, call volume, and service levels for 2,000+ employees across 17 business lines for a major US fintech client.
- Produced hourly, daily, and weekly performance reports for leadership in the Philippines and El Salvador.
- Coordinated with department heads to manage off-phone activity schedules and real-time exceptions.

- Supported operational planning, workload balancing, and live queue monitoring.
- Participated in process improvement meetings and documented reporting procedures.

Risk Operations Analyst Ubiquity (Client: CHIME) | Bacolod City, Negros Occidental | May 2022 - April 2024

- Handled high-risk transactions for a leading US fintech, including VISA/STAR chargebacks, dispute investigations, and fraud detection.
- Conducted regular risk assessments and collaborated with client-side teams to enforce fraud mitigation strategies.
- Delivered weekly presentations to clients' executive stakeholders on SOPs and risk analysis results.
- Identified trends in dispute cases and helped develop standardized procedures for fraud prevention.

Customer Care Specialist iQor (Client: METRO by T-Mobile) | Talisay, Western Visayas | January 2022 - May 2022

- Executed a multi-domain support role handling Tier 1 technical diagnostics, financial analysis, and revenue generation.
- Navigated complex proprietary software systems to isolate root causes of service interruptions and guide non-technical users through troubleshooting procedures.
- Managed high-tension billing disputes, audited account histories, and secured sensitive financial data in strict adherence to PCI-DSS standards.
- Consistently achieved strict performance KPIs (CSAT, AHT, FCR) while utilizing consultative sales strategies to mitigate churn and increase Average Revenue Per User (ARPU).

Technical Support Agent Panasiatic Solutions (Clients: Tracfone, PagePlus, Total Wireless - Verizon) | Bacolod City | April 2021 - January 2022

- Provided comprehensive technical troubleshooting for mobile hardware and network connectivity, resolving signal latency via OTA programming and PRL/APN configurations.
- Diagnosed provisioning failures to ensure devices were accurately registered on network switches for VoLTE and 4G/5G data transmission.
- Managed end-to-end Local Number Portability (LNP) requests, coordinating with inter-carrier support teams to clear fallout errors and system rejections.
- Awarded Top Agent for Q4 by balancing efficient technical problem-solving with effective customer retention and de-escalation strategies.

CERTIFICATIONS

- **Workforce Manager Certificate – Top 5% Performer** | Pro5.ai | Issued Sep 2024
- **Foundations of User Experience (UX) Design** | Google (Coursera) | Issued Aug 2025
- **Google IT Support Professional Certificate** | Google (Coursera) | Issued Aug 2025
- **Google Business Intelligence Professional Certificate** | Google (Coursera) | Issued Jul 2025
- **Google Cybersecurity Professional Certificate** | Google (Coursera) | Issued Jun 2025
- **MATLAB: Data Analysis** | MathWorks | Completed Nov 2024
- **EF SET English Certificate (C1 Advanced, 70/100)** | EF SET | Issued Aug 2025
- **Cisco Networking Basics** | Cisco Academy | Issued Aug 2025
- **Security Officer I** | Department of Labor and Employment (DOLE) | Issued Nov 2025

PROFESSIONAL DEVELOPMENT & AI WORKSHOPS

- **Google DevFests 2023, 2024, 2025** | Attendee - Google Developer Group Bacolod
- **GDG Bacolod – "Build with AI 2025"** | Workshop Participant | May 2025
- **GDG Bacolod – "Google I/O Extended Bacolod 2025"** | Workshop Participant | Aug 2025

TECHNICAL SKILLS

- **Data & Business Intelligence:** Exploratory Data Analysis (EDA), Data Modeling, ETL Concepts, Looker, Data Visualization, Dashboarding, Stakeholder-Focused Reporting.
- **Programming & Scripting:** Python, Bash, SQL, VBA, Next.js.
- **Networking & Cloud Security:** Network Communication, Protocols, IP Addressing, Routers, DNS, Cisco Networking Basics, Network & Cloud Security, Threat Detection (SIEM, IDS/NIDS), Vulnerability Assessment.
- **AI & Emerging Technologies:** Generative AI Tools, Machine Learning Fundamentals, Prompt Engineering, AI Agents, Agentic Workflows, LangChain.
- **Workforce & Operations Management:** Real-Time Monitoring & Reporting, Forecasting, Schedule Adherence Tracking, Cross-functional Coordination, Performance Metrics Analysis, Process Optimization.
- **Tools & Platforms:** Microsoft Excel (Advanced + VBA), Google Workspace, Monday.com, Looker Studio, Firebase, ADK, Gemini, Realtime RAG, Multimodal Live API, Jupyter Notebooks, GitHub, VirtualBox, Zendesk, GoHighLevel, Kajabi, MailChimp.
- **Operating Systems & Environments:** Linux (Ubuntu, Kali), Windows, Virtual Environments (VMs).
- **Digital Marketing & Virtual Assistance:** Marketing Funnels, Email Marketing, CRM Management, Sales Funnel Optimization, Social Media & SEO Management, Workflow Automation.

PROJECTS

Smart Pedestrian Lane System (Capstone Project) | CHMSU | Dec 2025

- Engineered a "Pedestrian Lane with Dynamic Line-by-Line Illumination for Night-Time Safety" to address critical public safety issues through responsive smart infrastructure.
- Designed the hardware logic and microcontroller integration to dynamically control illumination based on real-time environmental factors and presence detection.

Home Security System Using Reed Switch & ESP32-CAM Hardware & Systems Developer | CHMSU – CpEMIC Project | 2025

- Designed a presence-based home security system using ESP32-CAM and a reed switch for automated nighttime monitoring.
- Implemented lightweight frame-differencing for privacy-preserving motion detection without image capture.
- Integrated modular hardware components (reed switch, buzzer, LED) via GPIO for real-time alerts.
- Automated arming/disarming using door-state logic to remove manual user intervention.

Cordova AI Creatives (CAiC) – AI Agent Integration & Automation Prototyping Founder & Lead Developer | Bacolod City, Philippines | 2025–Present

- Built a client-facing AI agent using LangChain, Gemini, and ADK to automate service-related inquiries.
- Structured modular prompts and knowledge bases for consistent, brand-aligned responses.
- Set up early RAG and multimodal API hooks to support future agentic workflows.
- Exploring n8n automation for backend triggers, multi-platform integration, and scalable deployment.

All-Star Cruise – Event Marketing Systems & Funnel Development Marketing Systems Designer | Star Network | 2025

- Supported digital marketing efforts for the All-Star Cruise campaign, including content preparation and asset coordination.
- Assisted in organizing promotional materials and ensuring brand-aligned presentation across event pages and partner platforms.
- Contributed to workflow setup and content structuring to improve clarity, engagement, and user navigation.
